

envirotank
Recognizing the needs of tomorrow. Providing solutions today.

GET THE ENVIROTANK A•D•V•A•N•T•A•G•E

**SERVING YOUR SECTOR,
FULFILLING YOUR
REQUIREMENTS**

**COMPLETE, COMPACT, SELF
DIKED CONTAINMENT**

Envirotank, manufactured by AGI, is a safe, clean and conscientious method to handle used oil. Proper handling and storage of used oil is everybody's responsibility. Whether needs are at a high volume commercial level or for your own shop, these Used Oil **Envirotanks** will fulfill your requirements.

COMPLETE

Used Oil envirotanks are delivered to your site ready for use. The tank comes complete with stairs, providing easy access to the large lockable spill box. Equipped with a removable mesh tray, this ideally serves for both the disposal and removal of the product.

So, whether you're depositing product or pumping it out, you're assured of no splash, no spill containment.

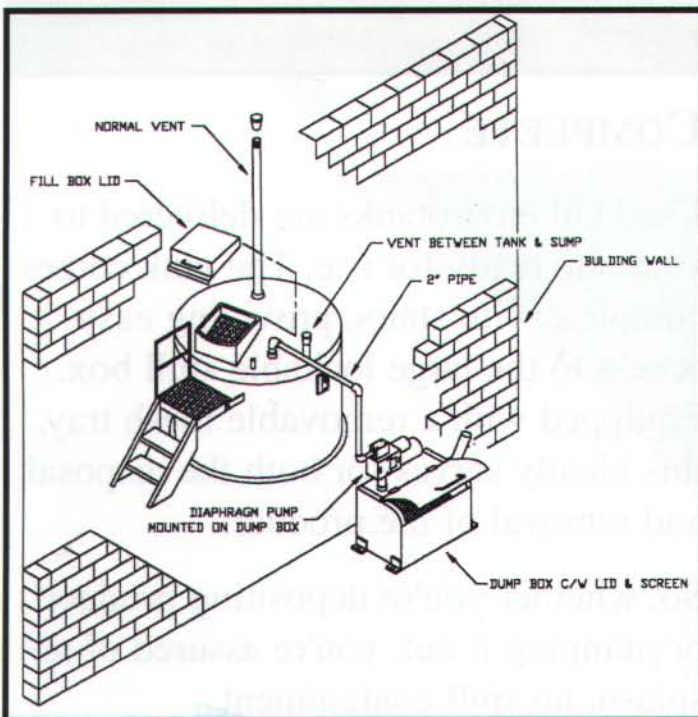

WASTE OIL TRANSFER SYSTEMS

Add a waste oil transfer system to your Envirotank and save foot steps. No more hauling oily 5 gallon pails outside in the winter. Simply, drain your waste oil into the collectors and turn on the pump.

- ❖ both air and electric driven pumps available
- ❖ c/w overflow prevention (to protect your Envirotank from being overfilled)
- ❖ choose from different styles of collectors (as they appear on this brochure)

Rethink, Reduce, Recover, Recycle.

For more information on an *Envirotank* contact AGI, your *Envirotank* specialists. Our self-diked, aboveground storage tanks are clearly ahead of the rest.
